Why the Industry is moving towards FORK TRUCK FREE Cart Delivery Systems?

Fork Truck Free (FTF) means to use minimal to no fork trucks in the movement of material throughout a plant floor. Fork Truck Free Cart Delivery is the use of industrial cart systems to move material as an alternative to the use of and dependency on fork trucks. Though it is a very thorough, thought-out process to convert material movement to Fork Truck Free, it is becoming a significant industry trend. This is due to the many benefits that result from implementing Fork Truck Free applications with cart delivery.

For more information on the benefits of Fork Truck Free applications, please visit

www.forktruckfree.com.
