INDUSTRIAL CARTS

1

STATIC CART - - - - A standard industrial cart with a rigid fixed deck that can be pushed or tugged.

REF:CT31223

REF:CT32530

REF:CT44592

Static Carts track in a straight line and can be towed in multiples. Come in 4 wheel and 6 wheel design.

QUAD STEER CART - - - - - An industrial delivery cart equipped with four wheel steering.

REF:CT30321

REF:CT21665

REF:CT45369

Four wheel steering allows carts to track smoothly when being pulled with multiple carts in tow. By design, they track extremely well and handle tight turn radius.

ROTATE CART - - - - - A static cart base with a rotating top.

REF:CT30321

REF:CT77719

REF:CT30896

The rotating top rotates 360 degrees to various work stations. The operator rotates the unit by releasing the foot actuated detent to rotate and access parts from any side from one position.

MOTHER CART ----- A Mother Daughter Cart System is pulled by a tugger or tugging vehicle.

The system consists of one large mother frame cart and two or more, smaller daughter delivery carts. The daughter carts are designed to fit within the mother cart's frame work.

TILT CART ----- A rugged industrial cart with an unique upper frame that tilts to a specified degree.

Standard tilt angles include 30°, 45°, and 60°, tilt but carts can be custom-engineered to accommodate virtually any angle to meet unique application needs.

SERVICES OFFERED

2

Topper Industrial specializes in services to Manufacturing, Fulfillment, Warehousing & Distribution Sectors.

Topper Industrial's Services include, but are not limited to:
Design & Customization
Manufacturing & Production

Topper specializes in the complete design, build & fabrication of custom material handling carts and cart components.

CONTAINERS

Corrugated Steel Containers.

Topper Steel Containers are offered in many different sizes & standard options. The standard nominal inside heights are 18" & 24."

Available add-on options:

- Drop Gate
- Fixed Hopper Front
- Lifting/Crane Lugs
- Fork Stirrups
- Angle Runners
- Fork Tubes

Paint Colors Available: Blue, Gray, Black, Green and Teal.

****Topper Containers have a uniform load capacity of 4,000 pounds and can be safely stacked up to five high.****

Wire Mesh Steel Containers.

Topper Wire Mesh Containers provide clear visibility of contents, effortless inventory checks, and enhanced air circulation. Offered in six standard sizes. Featuring open-side construction with welded 1.5-inch on-center mesh panels & rugged corner assembly with a corrugated sheet steel bottom.

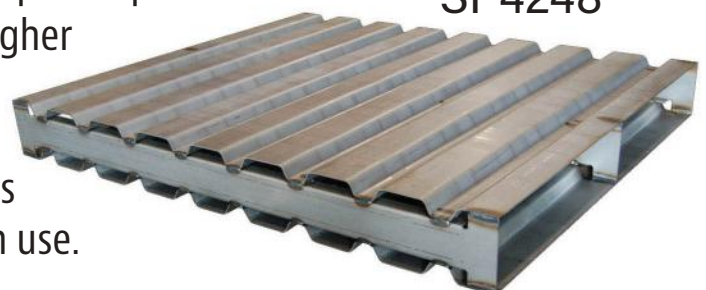

5

PALLETS

Topper Pallets are a great alternative to plastic pallets. Topper steel pallets offer the most for higher load capacities and fire resistance.

Steel pallets can be loaded on rack beams & can be stacked for storage when not in use.

SP4248

CART LIFTS/TILTS

Topper Cart Lifts position the pallet at an ideal height for the operator.

Cart Lifts are available in pneumatic & electric hydraulic power. Additional design options:

- lift tilts and lift tables.

REF:CT41411

The lifts are able to be loaded by fork truck, crane, conveyor and by cart.

When utilizing cart load, the lift tables elevate the cart with the product on it.

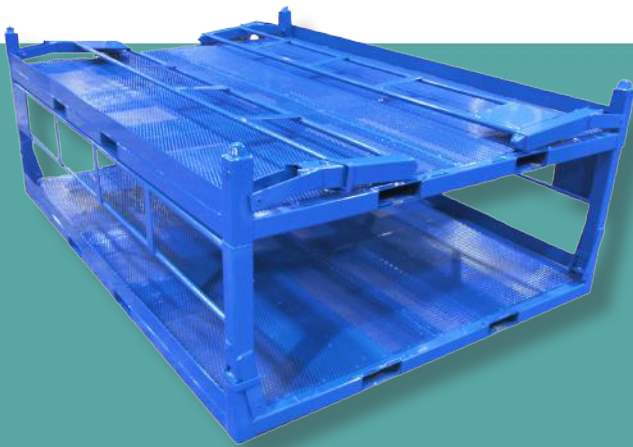

REF:CT41414

Additional safety options:

- Safety skirts
- Light indicators if needed
- Hand or foot controls
- Safety colors available

CUSTOM EQUIPMENT APPLICATIONS

Topper Industrial designs and builds all the equipment needed to move material and deliver it line side.

Topper Industrial's reputation is built on honest, hardworking and reliable workmanship.
